

The Overarching Goal of the QEP
Submitted in Response to the SACS Visiting Committee's Report
(August 2009)

To design, implement, and maintain an effective program that provides improved instruction and holistic support services to underprepared students and assist them in acquiring the critical thinking skills and attitudes necessary for success in the general education curriculum.

1. To assist underprepared students in acquiring the vocabulary, comprehension, and fluency skills necessary for reading and understanding college-level material.
2. To assist underprepared students in developing logical and effective written communication skills at the college-level, using Standard English.
3. To assist underprepared students in acquiring the mathematical concepts and competencies necessary for success in college algebra.
4. To assist underprepared students in acquiring the personal, technical, and social skills that promote college success through holistic support, membership in a learning community, and service learning.
